Subject: RE: SO2 designations

Off the top of my head, we've got:

- USG's Redwing facility in Goodhue County, MN.
- Alcoa near Evansville in Indiana (not sure of the county) next to Henderson, KY.
- Isolatek in IN
- Amsted Rail in IL, I believe in Granite City

These are the ones where we have not yet designated for Round 3.

Are you also interested in areas where we've designated already and may be coming up against attainment planning issues? That's a whole different list.

Doug,

This morning you rattled off a number of facilities that might be sticking points for designations. I would like APS to be looking for permits coming out for these facilities (i.e., Charter Steel) so that we can coordinate with your group making sure that everything is working together. Could you send me a list of the facilities that your group is concerned about?
